Ms. Morin,

Please find attached two letters, dated December 23, 2014, from NMFS in response to your August 28, 2014 letter regarding Cape Wind's Construction and Operations Plan and your September 9, 2014 letter regarding Atlantic sturgeon. We are copying the US Army Corps of Engineers, EPA and Department of Energy here, as they are also action agencies.

Please let me know if you have any questions regarding this correspondence.

Re: Cape Wind Associates, LLC ("Cape Wind") - EPA Permit Number OCS-R1-01

Dear Administrator Spalding:

Thank you for your letter dated November 5, 2014. Your letter stated that EPA is aware that New Bedford, Massachusetts "may be used" as the project staging area for Cape Wind's OCS project. Based on our review of numerous news publications and Cape Wind's own website, there is no doubt that Cape Wind will be using New Bedford, Massachusetts as its staging area and not Quonset Point, Rhode Island. See attached at Tab A.

The consequences of this change are significant. The permit issued to Cape Wind was predicated upon the use of Quonset Point, Rhode Island as the project staging location. As EPA has already acknowledged, "[t]his change in staging location likely affects some of the analyses and conclusions presented to EPA."¹ As you aware, in 2010, EPA temporarily stopped reviewing Cape Wind's permit application upon learning that Cape Wind was considering using New Bedford as its staging location. See attached at Tab B. In response to EPA's request to disclose the real staging location, Cape Wind would not confirm the abandonment of Quonset Point. See attached at Tab C. Based on the recent news, Cape Wind would be unable to provide the same denial today. EPA conducted necessary due diligence in 2010 based upon news reports, and highly reliable information now available through public sources confirms the intent of Cape Wind to change the staging area to New Bedford. Indeed, the Alliance has pending FOIA requests at both the Bureau of Ocean Energy Management (BOEM) and the City of New Bedford for the notice of project change. BOEM has confirmed that such a document exists and will respond by December 31. Tab D. New Bedford also has promised a response by December 24. Tab E. In consideration of this information, your November 5 response that Cape Wind "may" change its staging area is clearly wrong. Hopefully, EPA has fulfilled its Clean Air Act responsibilities by now and confirmed the project change.

¹ Letter from S. Perkins, EPA to D. Duffy, Cape Wind, October 29, 2010.

4 Barnstable Road, Hyannis, Massachusetts 02601

□ **508-775-9767** □ **Fax: 508-775-9725**

Mr. Spalding
December 19, 2014
Page 2

An air emissions permit cannot be considered valid once the data upon which the permit was issued is no longer reliable. And, neither EPA nor the public has had an opportunity to review and comment on the vessel traffic and vessel emissions that will result from the New Bedford staging location. Because Cape Wind has committed to change the staging location to New Bedford, EPA should revoke permit number OCS-R1-01 and initiate a new public review process under the Clean Air Act as well as further NEPA review.

Please feel free to contact me if you have any questions.

Very truly yours,

Audra Parker
President and CEO

New Bedford to be Cape Wind staging area

By - Associated Press - Friday, September 12, 2014

NEW BEDFORD, Mass. (AP) — The developers of a proposed wind farm off the coast of Cape Cod have signed a lease agreement with the state to use New Bedford for staging and construction of the 130 turbine project.

Cape Wind is expected to officially announce the news at 11 a.m. Friday with Gov. Deval Patrick at the Massachusetts Clean Energy Center's Wind Technology Testing Center in Boston.

Patrick tells The Standard-Times (<http://bit.ly/1qrgBMv>) that "Cape Wind is going to be built out of New Bedford, not Rhode Island, that's the bottom line."

Cape Wind had previously signed lease options with both South Terminal, now formally called the Massachusetts Marine Commerce Terminal, and Rhode Island's Quonset Point.

The two-year lease is for \$4.5 million.

When built, it will be the nation's first offshore wind farm.

By Jack Newsham

GLOBE CORRESPONDENT SEPTEMBER 13, 2014

The company behind the controversial wind energy project off Cape Cod has signed a two-year lease with the state for a terminal in New Bedford harbor that will act as the staging area for the offshore construction.

Under the agreement, Cape Wind will pay the state \$4.5 million to use the 28-acre site for two years, starting January 2015. It will use the facility called South Terminal to assemble workers, materials, and equipment, which will be ferried about 30 miles to Nantucket Sound, where more than 100 wind turbines will be installed.

Cape Wind estimated construction of the \$2.5 billion project, touted as the nation’s first offshore wind farm, will create between 600 and 1,000 jobs. Previously, Cape Wind has considered using port facilities in Rhode Island.

The terminal, which occupies 28 acres just inside New Bedford’s hurricane barrier, is itself still under construction but is expected to be completed in December. Despite its waterfront location, the terminal will be able to support loads of up to 4,000 pounds per square foot and a crane weighing nearly 3 million pounds that could lift cargo weighing more

Wind Farms More Profitable.
Read Whitepaper!

than 1.1 million pounds. Backers of the project said South Terminal could later be used for staging future offshore wind projects.

“We have positioned Massachusetts as a first-in-the-nation hub for a new offshore wind industry that will bring jobs and a clean source of Massachusetts-made energy for future generations,” Governor Deval Patrick said in a statement.

The New Bedford harbor has undergone renovations in preparation for the offshore wind project. Dredging, engineering, construction, and environmental cleanup efforts associated with the project are expected to cost \$100 million, paid by the state.

The Cape Wind project has been fiercely opposed by Cape and Island residents who say the massive wind towers will destroy views, do other environmental damage, and increase electricity costs for Massachusetts residents. Opponents have filed several legal challenges over the years — some are still pending — but Cape Wind has largely prevailed and moved forward.

UNITED STATES ENVIRONMENTAL PROTECTION AGENCY

REGION 1

5 POST OFFICE SQUARE, SUITE 100
BOSTON, MA 02109-3912

OCT 29 2010

Mr. Dennis Duffy,
Vice President Regulatory Affairs,
Cape Wind Associates, LLC
75 Arlington St., Suite 704
Boston, MA 02116

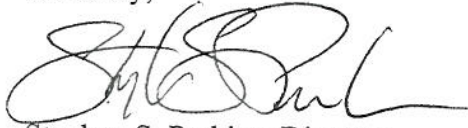

Dear Mr. Duffy,

I read with interest Governor Patrick's announcement that Cape Wind Associates will use the proposed Marine Terminal in New Bedford to stage construction of the Cape Wind Energy Project. As you know, Cape Wind's application to EPA for an Outer Continental Shelf Air Permit under Section 328 of the Clean Air Act was predicated (at least in part) on staging the project from Quonset Point in Rhode Island. This change in staging location likely affects some of the analyses and conclusions presented to EPA in the air permit application, and/or presented to other agencies for the purpose of other federal statutory requirements with which EPA must comply in issuing an air permit.

I am requesting that Cape Wind Associates confirm that it has revised its project plan and provide EPA with any and all appropriate amendments to the air permit application as soon as possible, including a statement of Cape Wind's views regarding which, if any, of the reviews conducted by other federal agencies need to be revised before EPA could issue a final Outer Continental Shelf Air Permit. While EPA will continue to prepare responses to public comments on the proposed permit on matters that would be clearly unaffected by the location of the project's staging area, I have directed my staff to put the remainder of the work on this permit application on hold until we receive the information requested above from Cape Wind.

Ida McDonnell, Chief of our Air Permits Unit, has already reached out to Rachel Pachter to convey this message and she will be available to answer any questions your staff may have. Ida can be reached at 617-918-1653.

Sincerely,

A handwritten signature in black ink, appearing to read 'Stephen S. Perkins', written in a cursive style.

Stephen S. Perkins
Director
Office of Ecosystem Protection
U.S. Environmental Protection Agency
Region 1
5 Post Office Square, Suite 100
Boston, MA 02109

Dear Mr. Perkins,

I am writing in response to your letter of October 29, 2010, in which you state that you have directed EPA staff to put "on hold" the review of our pending air permit application. For the reasons set forth below, we respectfully request that you rescind that directive and allow your staff to complete its review of the application. In response to your request, I also wish to confirm that Cape Wind has not revised its project plan, nor has it altered any portion of the air permit application as filed with your office. There has thus been no change to Cape Wind's proposal that would require EPA or any other agency to modify its review of the project.

Please be further advised that the Commonwealth's referenced proposal to develop a Multi-Purpose Marine Terminal at New Bedford remains subject to several contingencies beyond our control, and it remains unclear as to whether such a facility would be completed and available on a timeline consistent with our project construction requirements. In the event that such a facility were to become both completed and available on a timely basis and CWA proposes to use it for all or a substantial part of its staging requirements, Cape Wind would alter its project plans and make the appropriate regulatory filings at that time. As of this time, however, CWA has made no such change to its project or to its pending air application.

We also note that if CWA were to amend its project plans to reflect utilization of a staging area in New Bedford, it is unlikely that such a modification would have a significant impact upon an air permit issued in response to the currently pending application. We note in this regard that (i) Section 55.2 of the EPA's OCS Air Regulations provides that "emissions from vessels servicing or associated with an OCS source shall be considered direct emissions while at the source and while enroute to or from the source when within 25 miles of the source...." and (ii) it is unlikely that any such project modification would indicate a significant alteration to

Stephen S. Perkins
November 17, 2010
Page 2

vessel activity within such jurisdictional area. In any event, the particulars of any such potential or future modification remain speculative at this time.

Please feel free to call if you should have any questions and we respectfully request that you allow your staff to promptly complete the review of the pending application.

Sincerely,

Dennis J. Duffy
VP – Regulatory Affairs

RE: Freedom of Information Act (FOIA) Request No. BOEM-2014-00100

Dear Ms. Taylor,

This letter is in response to your FOIA request of September 22, 2014 to the Bureau of Ocean Energy Management (BOEM) for a copy of the modification to Cape Wind's Construction and Operations Plan seeking BOEM's authorization to use the Massachusetts Marine Commerce Terminal in New Bedford as a staging area (BOEM-2014-00100).

The search for records in response to your FOIA request has been completed. However, our review of the requested material is still pending.

Unusual and Exceptional Circumstances

In our correspondence to you of October 1 and October 22, 2014, we advised you that the Bureau was taking a 10-workday extension under 43 CFR § 2.19 and would respond to your request by November 4, 2014, or notify you of any delay.

At this time, we would like to notify you that we are experiencing a delay in the processing of your request. In addition to the unusual circumstances (as defined in 5 USC § 552(a)(6)(B)(i)) which prompted the Bureau to take the 10-day extension, we are experiencing a backlog of requests and must respond to your request in the order it was received. Currently, your request is number seven in our "Complex" processing track (refer to 43 CFR § 2.15(c)(3)).

We are doing everything we can to process your request and the others ahead of it in the processing queue in a timely manner. However, due to unforeseen circumstances, including the loss of key personnel earlier this year, and a significant increase in new requests received during the last six months (as compared to the same period in prior years), we are unable to respond to your request at this time.

Our revised estimated response date for responding to your FOIA request is December 31, 2014. Of course, we will respond earlier if it becomes possible to do so.

Appeal Rights and Mediation Services

Although we hope that you will wait so that we can complete our review and consultation process, you may file an appeal with the Department's FOIA/Privacy Act (PA) Appeals Officer regarding this delay.

If you choose to appeal this delay, you may do so anytime between now and the date we make our final determination on your FOIA request. Appeals arriving or delivered after 5 pm Eastern Time, Monday through Friday, will be deemed received on the next workday.

Your appeal must be made in writing. You may submit your appeal and accompanying materials to the FOIA/PA Appeals Officer by mail, courier service, fax, or email. All communications concerning your appeal should be clearly marked with the words: "FREEDOM OF INFORMATION APPEAL." You must also include with your appeal copies of all correspondence between you and BOEM concerning your FOIA request, including your original FOIA request and BOEM's response. Failure to include with your appeal all correspondence between you and BOEM will result in the Department's rejection of your appeal, unless the FOIA/PA Appeals Officer determines that good cause exists to accept the defective appeal.

Please include your name and daytime telephone number (or the name and telephone number of an appropriate contact), email address and fax number (if available) in case the FOIA/PA Appeals Officer needs additional information or clarification of your appeal. Following are the contact details for the FOIA/PA Appeals Office:

Department of the Interior
Office of the Solicitor
1849 C Street, NW; MS-6556 MIB
Washington, DC 20240
Attn: FOIA/Privacy Act Appeals Office

Telephone: (202) 208-5339
Fax: (202) 208-6677
Email: FOIA.Appeals@sol.doi.gov

For more information on FOIA Administrative Appeals, you may review the Department's FOIA regulations at *43 CFR, Part 2, Subpart H*.

Also, the 2007 FOIA amendments created the Office of Government Information Services (OGIS) to offer mediation services to resolve disputes between FOIA requesters and Federal agencies as a non-exclusive alternative to litigation. Using OGIS services does not affect your right to pursue litigation. You may contact OGIS in any of the following ways:

Office of Government Information Services
National Archives and Records Administration
8601 Adelphi Road - OGIS
College Park, MD 20740-6001

Email: ogis@nara.gov
Web: <https://ogis.archives.gov>
Telephone: (202) 741-5770
Fax: (202) 741-5769
Toll-free: 1-877-684-6448

Please note that using OGIS services does not affect the timing of filing an appeal with the Department's FOIA & Privacy Act Appeals Officer.

Conclusion

We sincerely regret the delay in responding to your request, and appreciate your consideration in this matter. If you have any questions, feel free to contact us by email at boemfoia@boem.gov, by phone at (703)787-1315, or by postal mail at: FOIA Office; Bureau of Ocean Energy Management; Atrium Building, MS: HM-3127; 381 Elden Street; Herndon, VA 20170.

Sincerely,

X

Re: Request for Information

Dear Ms. Parker:

I am writing in response to your request to Mayor Jon Mitchell for records pursuant to the provisions of M.G.L. c. 66, section 10 (the "Public Records Law"). This office estimates that it would cost \$653.28 for the City to search its records to determine whether any responsive documents exist. This \$653.28 estimate represents 24 hours of work at the rate of \$27.22 per hour. Since we do not yet know how many documents, if any, are responsive to your request, we cannot provide an estimate for the charge of copying the documents at this time.

The City requires payment of the estimated fee before commencing the work on a public records request. If you wish for the City to proceed with researching your request, please send a check or money order to my attention made payable to the City of New Bedford in the amount of \$653.28.

Very truly yours,

What Government Officials Don't Want You To Know About New Bedford Ocean Wind Turbine Port

<https://www.bostonglobe.com/business/2014/12/24/operators-sought-for-state-new-marine-port-new-bedford/f7UMVRbJEdLyoVT6UK59CP/story.html>

An aerial view of the Massachusetts Clean Energy Center's New Bedford port.

By Jon Chesto GLOBE STAFF DECEMBER 24, 2014

The state's \$113 million marine terminal in New Bedford should be done within the next several weeks, but primary tenant Cape Wind Associates' arrival is still months away.

The News Media - What Aren't They Telling You - Plenty

The Incomplete New Bedford Ocean Wind Turbine Port has hit 113 million plus with NO end in site.

New Bedford Ocean Port Rail Road Fiasco -Phase Two

Cost of rail link not included in final price tag ! The price of the port has exceeded 113 million and skyrocketing into 2015 & 2016

Politicians & News Media Continue Hiding Facts

New Bedford Ocean Port Page 4 -3/4 Mile Rail Link Incomplete -Fiasco Continues

<http://images.masscec.com/uploads/programdocs/NBMCT%20Request%20for%20Information%20Final%204-14-2014%20rev%204-25-2014.pdf>

Rail - A planned rail extension of approximately three quarters of a mile intended to link the New Bedford Railyard directly to the New Bedford Marine Commerce Terminal has been planned but not constructed.

Massachusetts Lacks Investigative Journalism

Massachusetts Lacks Investigative Journalism

We owe much of the country divided to the news media only reporting one side of the news. How

has the media has lost its way ?

The media are the watchdogs of all three branches and has failed to inform the public about good and bad.

There are three branches of government which are executive, legislative and judicial. The media must tell the people what the three branches of government are doing.

The Massachusetts news media has NO system of checks and balances that keeps people informed. As a matter of fact they have a system in place reporting news through omission.

Local media has kept the public ill informed over the New Bedford Marine ocean wind turbine port and what our elected officials are doing. The port has been renamed on a weekly basis to confuse the public and keep the facts about the ongoing fiasco from the general public.

The news media today produces news stories by omission . They simply leave out what they don't want you to know.

The news media has signed onto the Massachusetts Green Energy "Agenda" of 2000 megawatts of renewable energy by 2020 at any cost to the citizens of Massachusetts. The cost is your health and tax dollars being poured out the back door of Beacon Hill. Most recently into New Bedford Harbor.

The executive branch of Massachusetts government decided in 2010 to build an ocean wind turbine port in New Bedford for 35 million. The port had already been built and permitted at Quonset Point, Rhode Island. Massachusetts officials from the executive office testified to state bonding committees they were 100 percent sure Cape Wind would construct and assemble their wind turbines in New Bedford. Cape Wind still today has NO federal permit to construct and assemble turbines in New Bedford .

How were officials 100 percent sure Cape Wind would build and assemble wind turbines in New Bedford ? They knew Cape Wind has been in litigation for over ten years and had NO permits to use New Bedford Harbor.

Folks, Today the Massachusetts Clean Energy Center admits the project has missed the target date which is today December 2014. The MassCEC admits the project has gone well over 100 million and refuses to admit when the project will be complete. The MassCEC is the owner of the New Bedford ocean wind turbine port or what ever they call it this week or next week and has been using renewable energy tax money and state bonds to continue the fiasco. Your money.

The project is a catastrophic financial fiasco. The MassCEC now states the project is going into "phase two." The rail road link is almost a mile away. The hurricane gate only has a "legal" clearance of 120 feet. The channel outside the hurricane gates hasn't been dredged for decades and can only attain the 30 foot draft at high tide. An AM radio station still sits tight in the middle of the port taking up 4 acres of land. "Phase two" could take until 2016 and how much more ? Like the Big Dig maybe a billion ? That's B like in Billion !

Why won't you read this in the newspaper ? Because everyone involved in the project is embarrassed. Politicians, contractors ,state and federal agencies including those whose political sympathies are aligned with the Massachusetts state "Agenda" of 2000 megawatts of renewable energy by the year 2020.

Massachusetts has been increasingly enacting laws mandating the loss of your health, property rights and your financial well being. We are counting on the news media to conduct and review the New Bedford Marine Ocean Wind Commerce Terminal.

Where has Attorney General Martha Coakley and the Massachusetts Inspector General been ? They are part of the "Agenda"

Recently a local newspaper endorsed Charlie Baker (R) for governor then almost the next day produced an editorial about their political sympathies.

Local newspaper :

"Our political sympathies are in general much more aligned with the progressive policies of the Democratic Party, both nationally and statewide."

Ida:

Thank you calling a couple of weeks ago regarding our letter to the EPA about the New Bedford staging location change that we have been hearing about for four years.

Now that there has been an official announcement on this location change, has the EPA received any notice of project change from Cape Wind regarding the move to new Bedford as reported in the press? If so, could you provide a copy of the application/notice?

This is a link to the Cape Cod Times where this quote appeared:

<http://m.capecodonline.com/apps/pbcs.dll/article?AID=/20140911/NEWS11/140919911&template=wapart>

"Cape Wind will file paperwork with the federal government early next week to modify its Construction and Operations Plan with the Bureau of Ocean Energy Management in order to deploy the wind project from New Bedford, company officials said."

Thank you again for your assistance.

Sandy,

You sent me an e-mail on August 19, 2014 asking if "... if any permit has been issued and if there are any documents/correspondence with Cape Wind or with any parties outside of EPA on this permit renewal are available for you to send to us?"

At this time, EPA is not issuing any additional permits to Cape Wind (CWA). As you know, CWA has requested EPA to extend the Phase I Construction end date for the current Outer Continental Shelf Air Permit issued to Cape Wind Associates, LLC (CWA) dated January 7, 2011. CWA has asked us to extend the end date from September 30, 2015 to September 30, 2017. EPA is currently reviewing this request and is evaluating whether CWA has met the conditions for such a change as specified in Section XI of the permit.

Section XI of the permit also contains a requirement regarding ESA. I am enclosing several letters recently sent regarding the status of the project's compliance with ESA. In particular, I have included a copy of EPA's letter to the Bureau of Ocean Energy Management where, based on the facts, EPA has determined that reinitiating the consultation requirements under ESA is unnecessary.

I will send you our determination once EPA has completed its review of CWA's extension request.

Sincerely,

Ida E. McDonnell, Manager

Subject: RE: Follow up on 5/22/14 Cape with Audra Parker

Hi Sandy,

I have the following responses to your questions below:

1. What is the status of EPA's review of Cape Wind's extension request?

EPA is currently reviewing the Cape Wind Associates request made on March 7, 2014 to extend the end date of the Phase I construction period from September 30, 2015 to September 30, 2017

2. What is the status on of Cape Wind request, timeline and process?

EPA will either grant or deny, via a letter, the request to increase the Phase I construction period in accordance with Conditions XI.A.1-4 of the Outer Continental Shelf Air Permit OCS-R1-01. At this time we have not established a firm response date to Cape Wind Associates request. With the recent resolution of the outstanding issues involving consultation under the Endangered Species Act, my staff will now focus on reviewing all other pertinent information regarding extending the end date for the Phase I construction period. I have attached to this e-mail our letter dated August 12, 2014 to the Bureau of Ocean Energy Management. Once we have come to a decision, our response letter regarding the extension request will be signed by the Regional Administrator.

3. Will the public have an opportunity to comment?

Granting or denying the extension of the Phase I construction period does not require modifying the permit. If the permit was required to be modified, EPA would need to follow the process for modifying the permit contained in 40 CFR parts 55 and 124. At this time EPA is not planning to conduct a formal public comment period concerning the extension request.

4. EPA to provide a copy of their decision when made.

EPA will send our decision letter regarding the Phase I construction end date extension to Save Our Sound and other interested parties.

5. Will you be responding to our comment letter?

We are currently evaluating the comments made in your April 1, 2014 and will respond to you once we complete our evaluation.

Please feel free to call me if you have any further questions.

Ida:

I am following up your call with Audra Parker regarding Cape Wind's CA permit on 5/22/14.

There were several questions that you were going to get back to us on after reviewing them with Jill Metcalf.

- What is the status of EPA's review of Cape Wind's **EXTENSION** request?
- What is the status on of Cape Wind request, timeline and process?
- Will the public have an opportunity to comment?
- EPA to provide a copy of their decision when made.
- Will you be responding to our comment letter (see attached)?

Thank you very much,
Sandy

Ida:

Thank you calling a couple of weeks ago regarding our letter to the EPA about the New Bedford staging location change that we have been hearing about for four years.

Now that there has been an official announcement on this location change, has the EPA received any notice of project change from Cape Wind regarding the move to new Bedford as reported in the press? If so, could you provide a copy of the application/notice?

This is a link to the Cape Cod Times where this quote appeared:

<http://m.capecodonline.com/apps/pbcs.dll/article?AID=/20140911/NEWS11/140919911&template=wapart>

"Cape Wind will file paperwork with the federal government early next week to modify its Construction and Operations Plan with the Bureau of Ocean Energy Management in order to deploy the wind project from New Bedford, company officials said."

Thank you again for your assistance.

Sandy

Sandy,

You sent me an e-mail on August 19, 2014 asking if "... if any permit has been issued and if there are any documents/correspondence with Cape Wind or with any parties outside of EPA on this permit renewal are available for you to send to us?"

At this time, EPA is not issuing any additional permits to Cape Wind (CWA). As you know, CWA has requested EPA to extend the Phase I Construction end date for the current Outer Continental Shelf Air Permit issued to Cape Wind Associates, LLC (CWA) dated January 7, 2011. CWA has asked us to extend the end date from September 30, 2015 to September 30, 2017. EPA is currently reviewing this request and is evaluating whether CWA has met the conditions for such a change as specified in Section XI of the permit.

Section XI of the permit also contains a requirement regarding ESA. I am enclosing several letters recently sent regarding the status of the project's compliance with ESA. In particular, I have included a copy of EPA's letter to the Bureau of Ocean Energy Management where, based on the facts, EPA has determined that reinitiating the consultation requirements under ESA is unnecessary.

I will send you our determination once EPA has completed its review of CWA's extension request.

Sincerely,

Ida E. McDonnell, Manager

Subject: RE: Follow up on 5/22/14 Cape with Audra Parker

Hi Sandy,

I have the following responses to your questions below:

1. What is the status of EPA's review of Cape Wind's extension request?

EPA is currently reviewing the Cape Wind Associates request made on March 7, 2014 to extend the end date of the Phase I construction period from September 30, 2015 to September 30, 2017

2. What is the status on of Cape Wind request, timeline and process?

EPA will either grant or deny, via a letter, the request to increase the Phase I construction period in accordance with Conditions XI.A.1-4 of the Outer Continental Shelf Air Permit OCS-R1-01. At this time we have not established a firm response date to Cape Wind Associates request. With the recent resolution of the outstanding issues involving consultation under the Endangered Species Act, my staff will now focus on reviewing all other pertinent information regarding extending the end date for the Phase I construction period. I have attached to this e-mail our letter dated August 12, 2014 to the Bureau of Ocean Energy Management. Once we have come to a decision, our response letter regarding the extension request will be signed by the Regional Administrator.

3. Will the public have an opportunity to comment?

Granting or denying the extension of the Phase I construction period does not require modifying the permit. If the permit was required to be modified, EPA would need to follow the process for modifying the permit contained in 40 CFR parts 55 and 124. At this time EPA is not planning to conduct a formal public comment period concerning the extension request.

4. EPA to provide a copy of their decision when made.

EPA will send our decision letter regarding the Phase I construction end date extension to Save Our Sound and other interested parties.

5. Will you be responding to our comment letter?

We are currently evaluating the comments made in your April 1, 2014 and will respond to you once we complete our evaluation.

Please feel free to call me if you have any further questions.

Subject: RE: Follow up on 5/22/14 Cape with Audra Parker

Hi Sandy,

I have the following responses to your questions below:

1. What is the status of EPA's review of Cape Wind's extension request?

EPA is currently reviewing the Cape Wind Associates request made on March 7, 2014 to extend the end date of the Phase I construction period from September 30, 2015 to September 30, 2017

2. What is the status on of Cape Wind request, timeline and process?

EPA will either grant or deny, via a letter, the request to increase the Phase I construction period in accordance with Conditions XI.A.1-4 of the Outer Continental Shelf Air Permit OCS-R1-01. At this time we have not established a firm response date to Cape Wind Associates request. With the recent resolution of the outstanding issues involving consultation under the Endangered Species Act, my staff will now focus on reviewing all other pertinent information regarding extending the end date for the Phase I construction period. I have attached to this e-mail our letter dated August 12, 2014 to the Bureau of Ocean Energy Management. Once we have come to a decision, our response letter regarding the extension request will be signed by the Regional Administrator.

3. Will the public have an opportunity to comment?

Granting or denying the extension of the Phase I construction period does not require modifying the permit. If the permit was required to be modified, EPA would need to follow the process for modifying the permit contained in 40 CFR parts 55 and 124. At this time EPA is not planning to conduct a formal public comment period concerning the extension request.

4. EPA to provide a copy of their decision when made.

EPA will send our decision letter regarding the Phase I construction end date extension to Save Our Sound and other interested parties.

5. Will you be responding to our comment letter?

We are currently evaluating the comments made in your April 1, 2014 and will respond to you once we complete our evaluation.

Please feel free to call me if you have any further questions.

Ida:

Thank you calling a couple of weeks ago regarding our letter to the EPA about the New Bedford staging location change that we have been hearing about for four years.

Now that there has been an official announcement on this location change, has the EPA received any notice of project change from Cape Wind regarding the move to new Bedford as reported in the press? If so, could you provide a copy of the application/notice?

This is a link to the Cape Cod Times where this quote appeared:

<http://m.capecodonline.com/apps/pbcs.dll/article?AID=/20140911/NEWS11/140919911&template=wapart>

“Cape Wind will file paperwork with the federal government early next week to modify its Construction and Operations Plan with the Bureau of Ocean Energy Management in order to deploy the wind project from New Bedford, company officials said.”

Thank you again for your assistance.

Sandy

Sandy,

You sent me an e-mail on August 19, 2014 asking if “... if any permit has been issued and if there are any documents/correspondence with Cape Wind or with any parties outside of EPA on this permit renewal are available for you to send to us?”

At this time, EPA is not issuing any additional permits to Cape Wind (CWA). As you know, CWA has requested EPA to extend the Phase I Construction end date for the current Outer Continental Shelf Air Permit issued to Cape Wind Associates, LLC (CWA) dated January 7, 2011. CWA has asked us to extend the end date from September 30, 2015 to September 30, 2017. EPA is currently reviewing this request and is evaluating whether CWA has met the conditions for such a change as specified in Section XI of the permit.

Section XI of the permit also contains a requirement regarding ESA. I am enclosing several letters recently sent regarding the status of the project’s compliance with ESA. In particular, I have included a copy of EPA’s letter to the Bureau of Ocean Energy Management where, based on the facts, EPA has determined that reinitiating the consultation requirements under ESA is unnecessary.

I will send you our determination once EPA has completed its review of CWA’s extension request.

Sincerely,

Ida E. McDonnell, Manager

Subject: RE: Follow up on 5/22/14 Cape with Audra Parker

Hi Sandy,

I have the following responses to your questions below:

1. What is the status of EPA's review of Cape Wind's extension request?

EPA is currently reviewing the Cape Wind Associates request made on March 7, 2014 to extend the end date of the Phase I construction period from September 30, 2015 to September 30, 2017

2. What is the status on of Cape Wind request, timeline and process?

EPA will either grant or deny, via a letter, the request to increase the Phase I construction period in accordance with Conditions XI.A.1-4 of the Outer Continental Shelf Air Permit OCS-R1-01. At this time we have not established a firm response date to Cape Wind Associates request. With the recent resolution of the outstanding issues involving consultation under the Endangered Species Act, my staff will now focus on reviewing all other pertinent information regarding extending the end date for the Phase I construction period. I have attached to this e-mail our letter dated August 12, 2014 to the Bureau of Ocean Energy Management. Once we have come to a decision, our response letter regarding the extension request will be signed by the Regional Administrator.

3. Will the public have an opportunity to comment?

Granting or denying the extension of the Phase I construction period does not require modifying the permit. If the permit was required to be modified, EPA would need to follow the process for modifying the permit contained in 40 CFR parts 55 and 124. At this time EPA is not planning to conduct a formal public comment period concerning the extension request.

4. EPA to provide a copy of their decision when made.

EPA will send our decision letter regarding the Phase I construction end date extension to Save Our Sound and other interested parties.

5. Will you be responding to our comment letter?

We are currently evaluating the comments made in your April 1, 2014 and will respond to you once we complete our evaluation.

Please feel free to call me if you have any further questions.

Hi Sandy,

I have the following responses to your questions below:

1. What is the status of EPA's review of Cape Wind's extension request?

EPA is currently reviewing the Cape Wind Associates request made on March 7, 2014 to extend the end date of the Phase I construction period from September 30, 2015 to September 30, 2017

2. What is the status on of Cape Wind request, timeline and process?

EPA will either grant or deny, via a letter, the request to increase the Phase I construction period in accordance with Conditions XI.A.1-4 of the Outer Continental Shelf Air Permit OCS-R1-01. At this time we have not established a firm response date to Cape Wind Associates request. With the recent resolution of the outstanding issues involving consultation under the Endangered Species Act, my staff will now focus on reviewing all other pertinent information regarding extending the end date for the Phase I construction period. I have attached to this e-mail our letter dated August 12, 2014 to the Bureau of Ocean Energy Management. Once we have come to a decision, our response letter regarding the extension request will be signed by the Regional Administrator.

3. Will the public have an opportunity to comment?

Granting or denying the extension of the Phase I construction period does not require modifying the permit. If the permit was required to be modified, EPA would need to follow the process for modifying the permit contained in 40 CFR parts 55 and 124. At this time EPA is not planning to conduct a formal public comment period concerning the extension request.

4. EPA to provide a copy of their decision when made.

EPA will send our decision letter regarding the Phase I construction end date extension to Save Our Sound and other interested parties.

5. Will you be responding to our comment letter?

We are currently evaluating the comments made in your April 1, 2014 and will respond to you once we complete our evaluation.

Please feel free to call me if you have any further questions.

Ida:
I am just checking in to see if Cape wind has submitted any application for a change of staging?
Thanks,
Sandy

Sandy,

We have not received any notice of staging area changes from the applicants.

Feel free to keep checking in.

Ida:

Thank you calling a couple of weeks ago regarding our letter to the EPA about the New Bedford staging location change that we have been hearing about for four years.

Now that there has been an official announcement on this location change, has the EPA received any notice of project change from Cape Wind regarding the move to new Bedford as reported in the press? If so, could you provide a copy of the application/notice?

This is a link to the Cape Cod Times where this quote appeared:

<http://m.capecodonline.com/apps/pbcs.dll/article?AID=/20140911/NEWS11/140919911&template=wapart>

“Cape Wind will file paperwork with the federal government early next week to modify its Construction and Operations Plan with the Bureau of Ocean Energy Management in order to deploy the wind project from New Bedford, company officials said.”

Thank you again for your assistance.

Sandy

Sandy,

You sent me an e-mail on August 19, 2014 asking if "... if any permit has been issued and if there are any documents/correspondence with Cape Wind or with any parties outside of EPA on this permit renewal are available for you to send to us?"

At this time, EPA is not issuing any additional permits to Cape Wind (CWA). As you know, CWA has requested EPA to extend the Phase I Construction end date for the current Outer Continental Shelf Air Permit issued to Cape Wind Associates, LLC (CWA) dated January 7, 2011. CWA has asked us to extend the end date from September 30, 2015 to September 30, 2017. EPA is currently reviewing this request and is evaluating whether CWA has met the conditions for such a change as specified in Section XI of the permit.

Section XI of the permit also contains a requirement regarding ESA. I am enclosing several letters recently sent regarding the status of the project's compliance with ESA. In particular, I have included a copy of EPA's letter to the Bureau of Ocean Energy Management where, based on the facts, EPA has determined that reinitiating the consultation requirements under ESA is unnecessary.

I will send you our determination once EPA has completed its review of CWA's extension request.

Sincerely,

Ida E. McDonnell, Manager

Ida:

Thank you for your response to our questions, sorry for the delay getting back to you.

We would like to inquire if any permit has been issued and if there are any documents/correspondence with Cape Wind or with any parties outside of EPA on this permit renewal are available for you to send to us?

Again, thank you for response.
Sandy

Hi Sandy,

I have the following responses to your questions below:

1. What is the status of EPA's review of Cape Wind's extension request?

EPA is currently reviewing the Cape Wind Associates request made on March 7, 2014 to extend the end date of the Phase I construction period from September 30, 2015 to September 30, 2017

2. What is the status on of Cape Wind request, timeline and process?

EPA will either grant or deny, via a letter, the request to increase the Phase I construction period in accordance with Conditions XI.A.1-4 of the Outer Continental Shelf Air Permit OCS-R1-01. At this time we have not established a firm response date to Cape Wind Associates request. With the recent resolution of the outstanding issues involving consultation under the Endangered Species Act, my staff will now focus on reviewing all other pertinent information regarding extending the end date for the Phase I construction period. I have attached to this e-mail our letter dated August 12, 2014 to the Bureau of Ocean Energy Management. Once we have come to a decision, our response letter regarding the extension request will be signed by the Regional Administrator.

3. Will the public have an opportunity to comment?

Granting or denying the extension of the Phase I construction period does not require modifying the permit. If the permit was required to be modified, EPA would need to follow the process for modifying the permit contained in 40 CFR parts 55 and 124. At this time EPA is not planning to conduct a formal public comment period concerning the extension request.

4. EPA to provide a copy of their decision when made.

EPA will send our decision letter regarding the Phase I construction end date extension to Save Our Sound and other interested parties.

5. Will you be responding to our comment letter?

We are currently evaluating the comments made in your April 1, 2014 and will respond to you once we complete our evaluation.

Please feel free to call me if you have any further questions.

Subject: Follow up on 5/22/14 Cape with Audra Parker

Ida:

I am following up your call with Audra Parker regarding Cape Wind's CA permit on 5/22/14.

There were several questions that you were going to get back to us on after reviewing them with Jill Metcalf.

- What is the status of EPA's review of Cape Wind's **EXTENSION** request?
- What is the status on of Cape Wind request, timeline and process?
- Will the public have an opportunity to comment?
- EPA to provide a copy of their decision when made.
- Will you be responding to our comment letter (see attached)?

Thank you very much,
Sandy
